Convenience of Persons Involved in Administrative Procedures through the Use of Information and Communications Technology and to Simplify and Improve Efficiency of Administrative Operations

- Amid a declining birthrate and an aging population, it is imperative to deliver high-quality administrative services despite limited human resources. To **enhance** citizen convenience and streamline administrative operations, it is essential to establish an environment where, in addition to a Digital First approach (completion of procedures digitally), administrative organs can seamlessly coordinate data. This will enable the filing a document once, and not to be required to do the same again by the authorities even for the different procedure (Once Only) and allow multiple procedures to be completed at a single location (Connected One-Stop).
- From the viewpoint of promoting smooth data coordination, it is necessary to thoroughly ensure the quality of data held by administrative organs.
- In addition, it is necessary to improve the convenience of the My Number Card, which is a mechanism for easily performing identity verification, which is the premise of smooth data coordination.
